

Why Get Vaccinated?

To Protect Yourself,
Your Coworkers, Your Family,
Your Community
and Those You Serve

Building our defenses against COVID-19 in this facility and in our community is a team effort. And you are a key part of this team. Getting the COVID-19 vaccine adds one more layer of protection for you, your coworkers, your family and those you serve.

Here are ways you can build confidence in the COVID-19 vaccines in your workplace, your community and at home:

- ✓ Get vaccinated and enroll in the v-safe text messaging program to help the CDC monitor vaccine safety.
- ✓ Tell others why you are getting vaccinated and encourage them to get vaccinated also.
- ✓ Learn how to have conversations about the COVID-19 vaccine with coworkers, family and friends.
